

Learning from forests, the project is conceived as a resilient ecosystem that adapts to changing conditions among time, not only during its lifetime but during the design process. Since its conception, a multidisciplinary team (municipality, promoters, planners and other technicians and social associations) will gather to accomplish the challenge that a constant changing habitat requires

First of all, to encourage the participatory and inclusive spirit, each neighbour will plant or transplant a tree. With time, those shoots and trees will become a forest, THEIR FOREST!

2030s
2038
2048
OUR FOREST!

Flexible typologies
Housing demanding for young people will increase in the next decade. We will need more communal and single apartments.

2030 → 2040

- 1 Bike and pedestrian trail
- 2 Ski trail
- 3 Sea Pool
- 4 Groyne
- 5 Boat pier to Palosaari
- 6 Outdoor sport facilities
- 7 Sport facilities (locker room and stockage)
- 8 Reversible parking
- 9 Communal centre
- 10 Daycare centre
- 11 Reuse, recycle and exchange Hub
- 12 Bicycle rental and repair
- 13 Sauna
- 14 Gym/ Outdoor gym
- 15 Workplaces
- 16 Local Food supplier

- 🚌 Bus stop

VII (STOREYS)
950 (Gross floor surface in m²)

PHASE I	26350 m ²	TOTAL 54240 m ²
PHASE II	23680 m ²	
PHASE III	4210 m ²	

We need big open spaces of different sizes for communal activities and gather in summer and spring! Like cinema, small concerts, flea market, small orchards...
All the vegetation should be autochthonous to assure low maintenance and sustainability.

The parking is going to be a gentle topography over the previous original height.

PHASE 2 x200
PHASE 1 x200

There will be a shift in mobility model. Reversible parking solutions capable to convert into workspaces!

x150 1200 m²
Parking → Atelier
