## Project Phases

Phase 1( 2025–2029) : Landscape Infrastructure & Visual Orientation
Enhance the site's landscape and improve visual connections from Veikko Kankkosen reitti to the southern side.
Lay the groundwork for future playful and functional elements.

Phase 2 (2029–2035) : Playful Park & Water Sports Center
Finalize a new, vibrant park with outdoor sport spaces of all sizes.
Complete the new water sports center and landmark pedestrian bridge, creating a playful, joyful journey through the site.
Redevelop the northern side into a cultural hub at the site of the old power plant.

Phase 3 (2035–2040) : Public Participation & Mixed-Use Development

Open discussion spaces for public participation from the outset.
Explore the potential to rebuild the Lahti Expo Center as a mixed-use destination, ensuring the built environment meets the evolving needs of locals and visitors.
